Increase ALOA education attendance via ALOA’s new veteran hiring program and receive incentives.

ALOA Education has gained approval for GI Bill funding to train veterans for new jobs in our great industry. But we need YOU to hire them.

**Hire a veteran taking classes through our retraining program and get some great stuff in return.** Receive a free two-day class at the 2017 convention for you or one of your employees (or a class at ALOA’s training center in Dallas), six months’ access to the digital version of Keynotes for you or an employee, and discounts for your new veteran employee.

Through our veteran training program, it costs you **nothing** to train a valuable new employee who already has job skills, commitment and focus.

If you’re interested in hiring veterans or would like more information about these incentives, please email education@aloa.org and put Support Veterans in the subject line.

SUPPORT VETERANS. SUPPORT ALOA.

PRODUCT ALERT
The Schlage electrified ND Grade 1 cylindrical lock has been redesigned to provide new benefits for the locksmith and their customers. The lock automatically detects 12-24V DC input and can change operating mode (EL/EU) by simply moving a switch on the chassis. "Plug in" RX means the locksmith only needs one lock to support almost any application. For the customer, 230 mA max current draw means up to 8 locks on a single 2A power supply, while the energy efficient 10mA holding current eliminates the "warm levers" found on other electrified locks.
